

Bougainville Ventures Inc.

We are a publicly traded enterprise positioned to aid the explosive growth of the cannabis and hemp production sectors. Bougainville provides strategic capital to these thriving industries through ownership and development of commercial and agricultural real estate properties. We offer fully built-out turnkey facilities equipped with state-of-the-art growing infrastructure for cannabis, hemp, and CBD oil production. Cultivators lease these facilities and pay affordable fee-based management costs to accelerate market entry and scalability.

Greenhouse Campus

Bougainville has acquired senior water rights and purchased four acres (expansion to twelve acres soon) of farmland in Oroville, WA that has been upgraded to be I-502 compliant. Our first tenant-grower is a tier three producer and processor that can produce up to 30,000 square feet of canopy space. We currently have 10,000 square feet of canopy space ready for occupancy.

Oregon Hemp Farm

Bougainville is finalizing a contract with Worm Castings Farms to provide them with initial capitalization for the development of ten acres of farmland in Newberg, OR. The company will have a 100% ownership interest in Worm Castings Farms. They are a natural hemp company that intends to develop 500+ acres of industrial hemp to process and sell for finished CBD oil products. They plant premium high quality cloned feminized hemp plants to maximize CBD oil content within each plant. In addition, they provide proven topsoil mix that will improve plant growth by 20%.
